

OverGuard by Overdrive

Keeping your Assets and Facility Safe

A Real-Time Location System that remotely tracks the status and movement of objects and people, delivering end-to-end visibility over your most valuable assets. OverGuard allows fast and precise tracking even in the most challenging conditions - improving worker safety, minimizing downtime, and maximizing performance.

Benefits

Enhance security and productivity with OverGuard.

Keep an eye on your employees and ensure they are safe even in high risk situations.

Real-time analytics on your entire operation.

Pinpoint accurate asset location and monitor its status and condition at a glance.

Monitor movements of forklifts and lifting trucks to optimize usage and enhance worker safety.

Safeguard equipment at all cost and prevent potential theft or loss.

Improve resource availability and get full knowledge on equipment usage.

Whether you are running a production facility or monitoring equipment, OverGuard grants you the power to gain full control over your assets anywhere- even in locations where GPS is not available.

Seamless Data Location Capabilities

We offer a variety of sensors and devices, ranging from Bluetooth Low Energy devices and Wi-Fi gateways to RFID technology that works seamlessly to any application.

Movement Tracking

Track people movement in workspaces, sporting events and concerts or even go beyond by monitoring safe social distancing.

Safety Monitoring

Receive alerts on any man down incidents or if emergencies arise.

Asset Tracking

Track assets to avoid delays and misplacements or even manage multiple items placed in a single location such as pallets and crates, both indoor and outdoor

Environmental Monitoring

Assess environmental conditions and trends in soil, air, and water

Smart Airport Monitoring

Track baggage, galley carts, and people within the airport

Smart Healthcare Monitoring

Save time and lives! Monitor staff, patients, and medical equipment within hospitals.

Get ready to explore a completely new dimension of facility monitoring. Integrate OverGuard into your operation today.

Who Are We

Overdrive is a Internet of Things (IoT) company that can intelligently connect physical assets with natural and artificial Intelligence across entire ecosystems so as to give clients the power to monitor, change and track virtually anything from practically anywhere. We provide a suite of holistic IoT products and solutions – all under one roof.

What We Do

Specialises in

- Fleet Management
- Assets Monitoring
- Environmental Sensing
- Vehicles Monitoring
- Real Time Location System and more.

Hello,
